

9/13/2020

Good Afternoon Family and Friends

This notice is to inform you that Sheyenne Care Center has worked hard at protecting our residents over the last 6 months. Unfortunately for the first time the testing results completed on 9/9/2020 identified one resident with a positive test result. The individual family members have been notified and will be kept informed. We have move the individual to our isolation area to prevent any further spread. The resident is doing well and has not shown any signs or symptoms of the virus. We continue to monitor the individual and all our residents and staff several times a day.

We are scheduled for residents and staff to be tested again on 9/16/2020. Our efforts are to stay on top of this to make sure we are doing everything we can to keep this virus out of Sheyenne Care Center.

If you have any question please feel free to call. 701-845-8222
