

1/4/2021

Sheyenne Care Center COVID test occurred on Thursday (12/31/2020). The test result identified all residents and staff tested negative.

If positive test results occur, residents will be moved into isolation immediately. The nurse will notify the family member immediately about the positive test result and move resident into isolation. Employees testing positive employees are sent home in isolation until cleared to return to work.

We have received our first allotment of the COVID vaccine last week. Although it was a small amount we started to provide the vaccine to the residents who have not been infected and have consented to receive the vaccine. This week allotment will provide more opportunity to continue vaccinating all residents who have consented to the vaccine. If you would like your loved one to receive the vaccine, please contact our Social Service representative and visit with them on the procedure we need to follow.

Our next COVID testing period is January 5<sup>th</sup>. Please continue to be safe, social distant, wear a mask, and wash hands / frequently sanitize to protect yourself and others from this virus.

If you have any questions, please feel free to contact the nurse manager in the area in which your loved one lives.

Thank you, and be safe.  
Happy New Year  
Craig Christianson, CEO
