Dear Families

Last week, the ND State Lab COVID testing department identified that their lab software equipment was malfunctioning and was sending out faults positives to LTC facilities when actually, they were negative.

Sheyenne Care Center has been in communication with the ND State Lab on whether any of our test results were in error. If we received information from the ND State Lab we would be in contact with you immediately. If you have any questions, please call and visit with me.

Craig Christianson, CEO
