

4/8/2021

Sheyenne Care Center COVID test occurred on Monday (4/5/2021). The test result from the Monday COVID testing was 100% negative. Although our last test result were negative, due to the positive test on 3/29/2021 and the restriction of 14 days still leaves the Special Care Unit residents temporarily close for visitation at this time. All other resident areas will continue with scheduled visitation.

If positive test results occur, residents will be moved into isolation immediately. The nurse will notify a family member immediately of a positive test result. The positive COVID test result requires staff to move the resident onto our isolation area, located on the 4th floor. Employees testing positive employees are sent home in isolation until cleared to return to work.

We continue to offer residents and workers the COVID vaccine. If you would like your loved one to receive the vaccine, please contact our Social Service representative and visit them on the procedure we need to follow. We do need consent from either the resident or their guardian before the vaccine is provided.

Our next COVID testing period is Monday, April 12th,. Please continue to be safe, wear a mask, wash hands, frequently sanitize, and social distance to protect yourself and others from this virus.

If you have any questions, please feel free to contact the nurse manager in the area in which your loved one lives.

Thank you, and be safe.
Craig Christianson, CEO
